Our Edmonton Letter

T. B. WINDROSS

Edmonton, Alta., May 20 — That an election before the snow flies is in the mind of political leaders and party officials is becoming more and more evident, despite denials from all quarters that any of them want an election.

During the past few days the Conservative party provincial executive met in Calgary to discuss plans and policies in the light of a possible election this fall. The Liberals have started work on plans for their pre-election campaign and have opened offices in the MeLeod Block, Edmonton with a publicity man in charge. Clarence Stout, former news editor of the Calgary Herald, has been appointed publicity man for the Liberal party.

Premier Aberhart still insists that he doesn't want an election and yet urges constituency groups to instruct "insurgent" members to cross the floor of the house, which obviously is the most certain way of securing an election, it is being pointed out by his critics.

The "insurgent" or 'progressive' M.L.As in the Social Credit party are perhaps the only ones who do not want an election. According to them all they ask for is a change in leadership. They have announced they would present a united front for Social Credit but not for Premier William Aberhart. And that about sums up the situation as regards the prospects for an election.

Certainly the old line parties are girding their loins for the battle and will make a desperate effort to defeat the government if it comes to a showdown.

There has been no announcement of a successor to S. G. Carlisle, livstock commissioner, so far, although Hon. D B. Mullen is expected to announce one during the present week. During the past week other changes have been made, including dismissal of W. Holdsworth, chief clerk in the livestock branch, after 24 years in the civil service.

In the public works department the axe has fallen heavily durin gthe last few days and on Tuesday it was announced by Hon. W. A. Fallow that H. P. Keith deputy minister of public works, had been asked for his resignation. Mr. Keith has held the deputy minister's job for the past three years and has been in the civil service for 20 years.

Thursday another dismissal was announced by Mr. Fallow and C. A. Davidson, highway commissioner, was let out of the service and his post combined with that of bridge engineer now held by N. W. Pacpherson. Mr. Fallow then announced that G. H. Monkman, resident engineer at Edmonton, will be the new deputy minister of public works. All the changes are being made with a view to efficiency and executive ability, Mr. Fallow stated. All the new officers will take over their jobs at once.

There had been no word received from Glen MacLaghlan, chairmnn of the Social Credit lanning board, who is in London, up to the time this news letter was written. No indication seems to be forthcoming as to whether Major C. H. Douglas will come to Alberta or not in the near future.

As the time for the re-assembly of the legislature draws near to th epublic to know what the Social Credit board is going to do about the report on a definite plan which it is expected to be in a position to make to the membes. One well-informed person stated this week that an announcement may be expeeted fro mMajor Douglas within a short time, and Dr. McPherson, acting chairman of the board while Mr. MacLaehlan is in London, said there may be word from Mr. Maclaehlan within a few days.

The question ofttenest on the lips of people in Edmonton in this connection is, "Will Major Douglas come? Many observers think he wont come while the present provincial executive is in power.

ROTARY MEETING MONDAY NIGHT

Regular Rotary meeting was held Monday night last. In the absence of Pres. Dr. Frank Hall and Vice Pres. M. R. Woolf, A. H. Zabriskie, Sec.-treas. was in the chair. Visitors from the Lethbridge Club were Messrs. W. H. Fairfield, Chris Hansen, Dan Daniel, Jack Hutchings and J. Kennedy.

The report of the recent Winnipeg Convention, given by President-elect Chris Hansen of the Lethbridge Club was the topic of the meeting, and the speaker reported a very interesting and beneficial Convention, and stated that Rotary was growing faster every day, an average of two and a half Clubs per week being formed for the past year. In returning home the Winnipeg visitors swung south into South Dakota and Montana and visited the great Fort Peck dam now under construetion. A hearty vote of thanks was given Chris for his talk.

The Chairman reported on the finances from the Operetta and the Minstrel Show, both of which netted nice sums for the Club. The National Anthem closed the meeting.

POWER LINES INSPECTED

Mr. Lebourvean, Chief Engineer of the Calgary Power Co., Ltd., Paul Wittock, District Superintendent and Don Robertson, local Manager, were in town the early part of the week and inspected the line and transmission system of the Company.

It was decided with the Company last winter that some rebuilding would be done this spring, and these officials were going over the system to determine just what was necessary and to arrange to have the work done as son as a crew can be put in here to take care of it.

NEWS NOTES

Grdon Brewerton, Cardston, was a Raymond visitor Thursday on business.

* * *

Beet thinning is in progress in many parts of the district at present.

:* * *:

Cardston is all Jubilee these days. Secretary Card is lucky in one way, he can't lose any hair over it, it's all gone now. He could and does lose a lot of sleep though.

* * *

Mesdames Wm. Payne, S. B. Smith, and N O'Bray of Mountain View and Cardston respectively were overnight guests at the Arthur Dahl home Tuesday night.

!* !* !* !

Results of recent heavy windstorms have been serious in Saskatchewan, all the fields of grain in some districts being completely blown out and ruined. One farmer said if they come back it will be something different than we have witnessed in our 27 years in this district.

Aaronic Priesthood Programs Sunday

Sunday was Aaronic Priesthood Day thru out the Church and the Sunday evening meetings in Raymond were under the directiion of the Aaronic Priesthood Committees of the two wards. Acting under the direction of the Bishops, a Priest conducted the Church outlined program as follows:

In the 2nd Ward Hans Anderson was in charge of the program.

Singing—The Spirit of God Like a Fire is Burning."

Prayer by John Heggie.

Song—"We Thank Thee O God for a Prophet."

Talk on Tithing—Lynn Zemp.

Several boys were graduated from the Primary into the Deacons Quorum.

Scripture Reading — Sidney Romeril.

"The Restoration of the Aaronic Priesthood—Monte Palmer.

"How the Priesthood Helped to Develop the Character and Personality of Joseph Smith"—Gerald Palmer.

Piano Solo—Duane Wiggill.

"The Aaronic Priesthood and its Activities as a Guide to Success in Life"—Billy Rodeback.

Scripture Reading — Brian Bennett.

"Our Plans for Aaronic Priesthod Social and Fraternal Activities this Year"—J. LeRoy Anderson, Aaronic Supervisor of the Ward.

"Progress of the Aaronic Priesthoodin Our Ward"—L. L. Palmer of the Bishopric.

Song "Praise to the Man."

Some of the Festival contest pieces were rendered as special musical numbers on this program.

Benediction—Robert Walker.

A good sized congregation was present and thoroughly enjoyed the program put on by the boys.

With L. J. Mchew, Supervisor of the Aaronic Priesthood in the 1st Ward, the following interesting program was carried out:

Winfred Litchfield had charge of the meeting, assisted by David Wood and Barker Selman. Opening Song "We Thank Thee O God for a Prophet."

Prayer —Harlan Taylor.

Song—"See the Mighty Angel Flying"—Solo part sung by Mrs. H. F. Allen.

Hugh Allred was the first speaker on "The Restoration of the Priesthood."

Scripture Reading — Chas. Bascom.

Instrumental Trio-Mac Hicken and the two McMullin boys.

Song by the Trail Builders.

Piano Solo—Kathleen Allen.

Piano Solo—Steele Brewerton.

Scripture Reading — Gordon Coombs.

Talk on Aaronic Priesthood Activities—L. J. Mchew, Supervisor.

Talk on Tithing —Bishop J. O. Hicken.

Benediction—Robert Brandley.

A good sized crowd was present and everyone thoroughly enjoyed the very well prepared program presented by the boys

News Notes

Harold Stevens of Magrath is clerking in the Grocery Depart mnt of the Raymond Mercantile Co., Ltd.

:* * *:

8 years ago June 1st we had a wonderful cloudburst and rain sometimes one almost wonders if it could happen again.

* * * *

Garden stuff was badly nipped by frost at Cardston last Saturday night. No frost was noticed in this district.

!* !* !* !

Many local people listened in Wednesday night to the Social Credit boadcast from Lethbridge Speakers resented facts and figures in their speeches to justify their position on public matters.

* * * *

Mr. Hicken has asked that on behalf of the School Staff and School Board we thank all those who so generously donated the use of their cars to convey the children to and from the classes in Lethbridge.

Most of the week the skies have been overcast and rain has threatened, although up to noon none had fallen to speak of.

* * *

30 miles of telephone line from Taber to Burdett are to be moved from the old Red Trail to the gravelled highway route work being under way now.

:* * *:

Advertising is as old as the world. Bruce Barton says the beginning of the creation of Mother Earth was the beginning of advertising. If you are not trying it why don't you. It is the life blood of business.

* * * *

Sometimes when a truck driver keeps you behind him for a few miles you get some rather vindictive feelings and would like to trade places with him for a while. Anyway truck drivers should keep their mirrors working and casually look at them once in a while.

Temple Excursion Next Monday

Taylor Stake Day at the Alberta Temple is Monday. Ward Genealogical Committees are making a drive to have six Taylor Stake companies at the Temple that day. The tentative plans call for three companies and two sessions each, and the assignments have been made as follows:

Magrath two wards; 7a.m. and 1p.m.

Raymond First and Stirling Wards; 9 a.m and 3 p.m.

Raymond Second and Welling Wards; 11 a.m. and 5 p.m.

The branches of Tyrell's Lake Wrentham and Coutts to fill in at any of the sessions they choose.

Locally Arthur Dahl and Parley Litchfield, Ward Chairmen of the Raymond two Wards with their committees are making a house to house canvas to make the excursion a success, andanyone who may not have transportation arranged should see members of their Ward committees before it is too late. and make sure of their means of travel for this yearly event.

Raymond Schools Take Eleven Firsts

Raymond's entries covered themselves with glory at the Festival in Lethbridge last Monday and Tuesday when entrants from here, totalling 33 entries copped eleven first prizes, and placed in everything entered, most of the numbers getting considerable praise from the adjudicators. Too much cannot be said in praise of Mr. Hicken and his staff, especially Miss Nalder, for the time and effort put into the work to achieve such fine results. Following is the list of prize winners:

School Chorus—1st directed by Miss Nalder. This is the fourth time that Raymond has captured 1st prize for the School Chorus.

Action Song—Grade II&II 1st Misses James and Johnson.

Vocal Solos

Jeannine Wilde Grade 1&2—1st

Myra Dahl Grade III&IV—1st

Teddy Allan Grade VII&VIII-1st

Stephen Wood Grade III&IV-2nd

Reed Walker Grade V&VI—2nd

Louise Allen Grade VII-VIII-2nd

Monte Scoville Open solo under 10 years—1st.

Estelle Scoville Open solo under 10 years—3rd.

Dramatics:—

Primary Grades —1st Junior Grades —1st Miss Kimball.

High School —2nd Miss Kitlitz.

Eloeution:—

Ardelle Palmer Grade III—1st.

Gordon Coombs Grade VI —1st.

Echo Collett Grade V—2nd.

June Keith Grade X—1st.

Franklin Smith XI—2nd.

THE WORLD OF WHEAT

By H. G .L. Strange

Director, Research Department, Searle Grain Company, Ltd.

Bushels threshed can never be more than the rainfall warrant.

That is a fundamental, natural law operating in Western Canada, and in any other semi-arid wheat area in the World.

Yields per acre,of course ,are partly dependnt upon many conditions which vary with each district quality of soil, amount of evaporation, occurrence of frost and hail, amount of insect infestation and of disease infection.

But the rainfall which occurs during the growing season, and during the previons fall months, has been found to be by far the most important factor governing bushels harvested.

How much rainfall is required to produce an average wheat crop.

Investigations that have been made by the late Sidney Barnes at the Dominion Experimental Farm, Swift Current, and by the Research Department of the Searle Grain Company seem to indicate that about 12 inches of rainfall is required to make an average crop. Of this some 8 inches is necessary during the growing season, from April 1st to July 31st, and about 4 inches during the previous fall months of August, Septmber and October.

More rainfall than this brings about a higher yield, less rainfall brings smaller crops less than 10 inches produces a small crop, less than 8 inches a complete failure.

The following factors have been tended to raise price: Unfavorable new crop prospects in importing countries—Complaints of rust in France—Corn planting delayed in the Balkans —Deficient rainfall in Australia and complaints of grasshoppers —Forecast of slight reduction in Canadian grain areas sown—Spanish pickled olive crop abnormally small—Irish Free State abolish customs duty on imported wheat.

The following factors have tended to lower price: —General rains in Russia and Balkan States— Agentine wheat arrives in U. S. for probable transshipment to Mexico—Seeding progresses and large acreage expected in Argentina—U. S. Government winter wheat estimate well maintained.

Monday is a statutory holiday and all stores and offices will be closed. Shop and plan accordingly.

SEVEN YEAR OLD WINS

In connection with the Festival this week in Lethbridge, Monte Scoville, in the Open Class under ten years, won his class and the following, containing the comment of the adjudicator, is of interest :

Little Monte, only seven years was the winner of this open class competing with children much older. The words of Arthur Benjamin Esq. of England are "One charming little fellow got the right interpretation." He also said "he had clear tone and good contrast, and was well in tune. He showed careful tuition and details were exceptional." Monte sang "Little Boy Blue" and was accompanied by Rhyddid Williams of Lethbridge.

NEWS NOTES

Will Stone has been in Calgary on business this week, driving up Tuesday.

:* * *:

Miss Ellen Gourley of Picture Butte has been visiting relatives and friends in Raymond for the past two weeks.

* * *

The wedding of Edward, Duke of Windsor, and Mrs. Wallis Warfield, will be solemnized in Monts, France, on June 3rd next The Mayor of Monts will perform the ceremony in the Chat cau where the famous lovers are now living.

!* !* !* !

Principal Hieken's big headache Tuesday was getting the boys and girls transported to and from Lethbridge for the Festival. Lee Brewerton, C. F. Tollestrup, Godfrey Holmes, Paul Dahl, and several others donated the use of their cars for the trip.

CLOSED SEASON FOR FISH

In an interview given today by the Hon. N. E. Tanner, Minister of Lands and Mines, emphasis was laid on the fact that a closed season for engling, domestic or commercial fishing existed at present for all classes of fish.

"Anyone employed in any form of fishing at the present season or being in possession of freshly caught fish or endeavouring to sell the same would immediately become liable to prosecution," the Minister stated.

Instances had occurred lately Mr. Tanner remarked, of people who had been guilty of an infrigement of the Regulations in this respect which necessitated a warning being sent to all proprietors of restaurants and hotels to the effect that the purchase of any Alberta fish, other than the frozen product, was at the present time illegal and subject therefore to the penaltles as laid down in the Act.

CONGRATULATIONS!

This week we feel to congratulate the School Board, staff and all concerned for the splendid showing Raymond made in the Festival events at Lethbridge Tuesday in the varions classes Raymond entered. It seems to prove what has been argued in the Town for many years, viz., "children do better in school work when there is some other diversion like music, elocution, or what have you to absorb their interest." When 11 firsts can be won with 33 entries, and practically everyone place amongst the winners we feel very proud of those who have trained the children, as well as the Board members who have organized so this work can be carried on.

There is also another angle to it. Any community is poor when they are poor in the appreciation of and the ability to create music. These boys and girls who are participating now in these musical events will soon be the ones coaching and leading singing in various organizations in the community. If their interest can be maintained and encouragd, it will make for better music as long as they live. Is this worth while? We maintain that it is, and we School Board that if it is possible to rganize to include a School Orchestra, or a School Band, more power to them, and they should receive the support of every wide awake citizen in these endeavors. We appreciate the fact that a strictly music teacher can not be afforded However, whatever the arrangement, Mis Nalder has certainly accomplished a fine work amongst the Public School pupils, and if some such an arrangement could be made in the High School then either with instrumental or vocal organizations there, the music could be continued into the period of the child's life whre it could be taken out into the community when school days for the average of them are completed.

It's easy to sit back and say it can't be done. We are not criticizing nor are we finding fault if it is not done. The school Board has plenty of problems that must be met without borrowing any more. At the same time, few parents are able to make musicians out of their children because they never had musical training in their youth, and so, we are standing still very largely when it comes to music. There may be no immediate solution to any further effort than is being made. However, changes are continually being made in the staff. The thought could be kept in mind and when an opportunity came, possibly made use of.

VELV HEGGIE WILL MANAGE BALL TEAM

At a meeting held Friday night last in Velv's Barber Shop, baseball was organized for the year, with J. V. Heggie as Manager, Loren [illegible] assistant and Jos. McLean as Coach. The diamond is being worked and put in shape for practicing, and any players interested in baseball are asked to come out and practice, and try for a place on the team. The regular lineup will be picked after everyone who so desires has had a chance to try out at the various points on the diamond.

It is likely a league will be formed later in the summer, and citizens are asked to support the boys and help to make the team a success.

Joseph H. Harker and wife of Shelley, Idaho, relatives of Mrs. Arthur Dahl, are visiting with relatives here for a few days.

* * *

Theodore Ehlers and son Henry are leaving Monday for Glenwood where they have some work waiting for them.

* * *

Don Wall is in Spokane at present, having taken his mother there for treatment in an effort to improve her health. Dean is looking after the farm while his father is away.

HERE'S A SIMPLE SPRAY TO KEEP DOG'S AWAY

If flower and shrubs are sprayed with a dilute nicotine sulphate, dogs and cats will avoid them. The spray is harmless and the smell is very offensive to these animals, even when applied so thinly that persons are unaware of its presence.

Nicotine sulphate may be purchased at any seed or drug store and should be used at the rate of one-half teaspoonful to a gallon of water. The spray evaporates and should be renewed after rains, or about every two weeks in ordinary weather.

METHOD OF CONTROL OF CABBAGE MAGGOTS

The cabbage maggot attacks cabbages, cauliflowers, turnips, and radishes. The adults, which are two-winged flies, lay their eggs on the stems of the plants about the time the European plum tree first comes into bloom in the spring. These insects can be controlled by the use of corrosive sublimate which can be procured at most seed houses. When used, the sublimate is diluted in water at the rate of one ounce to ten gallons. It loses much of its strength when brought into contact with metals, so it should never be in mixing or in distribution. Glass, earthenware, or wooden vessels must be employed. This is a very important point.

Two or three days after the cabbage and cauliflower plants have been set out in the field, the solution should —be poured over the stem and around the base of each plant, using about half a cupful per plant. Care should be taken to wet the stems thoroughly as well as the soil immediately surrounding the base. Two subsequent applications should be made, the second 7 days after the first application, and the third 7 days later, making three treatments in all. It is very important to make the first application early, as the success of the control depends largely on this point.

In the case of radishes, the solution should be poured over the young plants about three days after they appear above the ground, and a second application a week later. The radishes should not be treated when they are ready for use, because it is a dangerous practice. In view of the fact that corrosive sublimate is a deadly poison to human beings and animals, great care should be taken in its use.

Every possible member at the Temple Monday. Taylor Stake Day, be there.

* * *

The contract has been let for the grading and fencing of the Lethbridge airport and work is expected to commence in the immediate future.

* * *

Where is the truth? The insurgents accuse Premier Aberhart and the loyalists with every kind of dishonesty. On Sundays and in public meetings the Premier and his supporters state in no uncertain terms that the insurgents are a bunch of quitters and are not doing what the people sent the mto Edmonton to do.

NEWS NOTES

Potatoes are showing in many early planted gardens, and the warm days we have had, which while few, have brought fields and gardens on rapidly.

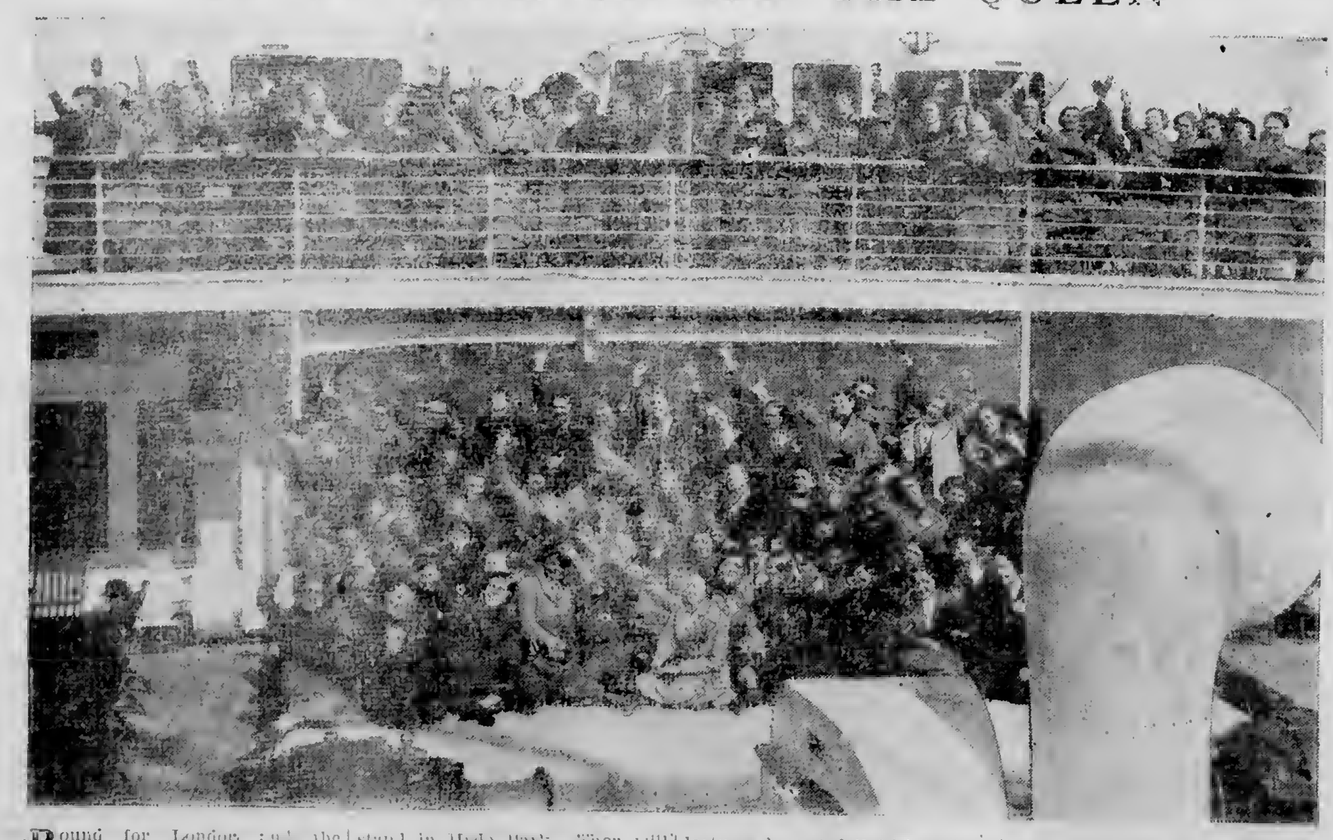
"TO LONDON TO SEE THE QUEEN"



Bound for London and the colourful ceremonies attendant upon the celebration of the Coronation of H. M. King George VI, 158 High School girls from Canada and Newfoundland sailed from Montreal Friday, April 30, in the Canadian Pacific liner Duchess of Atholl.

Travelling under the aegis of the Overseas Education League the students start their tremendous adventure by viewing the Coronation procession from a stand in Hyde Park. Then will follow in quick succession an Empire Youth Rally at the Albert Hall, May 18, the Empire Service of Youth to be held in Westminster Abbey, which will still be in its Coronation trappings, at which the Archbishop of Canterbury and Dean of Westminster will speak, sight-seeing in London, two weeks as guest pupils at famous English boarding schools, and two weeks sea-bathing and hiking interspersed with lectures by noted British authors at Eastbourne. They return to Canada aboard the Empress of Australia from Southampton, June 24, arriving at Quebec July first.

Every province of Canada is represented in the party which represents the pick of Canadian students. An equal number of boys sailed two days earlier and will return aboard the Montcalm, from Liverpool, June 23, arriving at Montreal June 30. Educational authorities throughout the Dominion co-operated in the selection of the students. Students who were unable to leave their studies for the coronation will have an opportunity of visiting the Old Country during Coronation year. Boys will leave in the Empress of Australia July 2, for a 57 day tour of Scotland, England and Germany; and girls, specializing on Great Britain, sail from Montreal the same day aboard the Duchess of Bedford. Both tours will be under the direction of the Overseas Education League.

WEEKLY LETTER

Soil drifting is in the minds of everyone in this territory since the severe wind storm of May 10. Undoubtedly in some localities farmers have again decided that soil drifing control is entirely impossible. Members of the staff of the Experimental Station have visited various localities where drifting has been experienced and while it has been severe on many farms, there are summer-fallowed fields in almost every locality that have not been damaged. Investigation usually shows that the owners of these fields have used good drifting control methods.

Perhaps never before has there been a better demonstration of the possibilities of hodling the soil by strip farming and careful cultivation to preserve a good trash cover than is presented at the present time. It is possible t ofind fields that have no drifted even on light or heavy soils that are very hard to hold.

The amount of drifting that has taken place this spring is not an evidence that there has been a failure in developing drifting control methods that are effective, but it is an evidence that many have not adopted these methods as fully as they should. Perhaps the greatest failure has been in preserving the stubble and other trash that is on the surface. Too many farmers have used discs and one ways on light stubble covering where nothing more severe than a duckfoot cultivator should have been used. Many have apparently cultivated their fields more than they should. Those who have been studying this situation have quite fully realized that the disc and one-way were being used to careless ly and in many of our previous letters this fact has been emphasized. From our present experience, it is evident that what may appear to be extreme measures are necessary if we are to avoid trouble when extreme conditions occur.

Special care must be taken to preserve a maximum amount of trash over on sandy soils or heavy clays. These soils will not maintain a lumpy structure and so must depend entirely on vegetable covering for protection against wind damage. Some will say as they read this that they cannot leave a trash cover on their fallows because they have so little stubble or other trash to leave. If this is the case, especially on readily drifting soil, it may be very unwise to attempt to summer-fallow at all. Surely it is not good business to fallow a field in such a way that drifting is inevitable. There are conditions that arise on some soils that make fallowing altogether too dangerous. Our experience this spring then should teach us that we must farm to meet extreme conditions. Cover crops have been effective when there has been sufficient moisture to produce a good late summer and fall growth but last fall they fail ed with dire consequences. Light trash covers may have been sufficient in ordinary years but more protection is required for extreme seasons such as this spring. If the methods we have been following have not been satisfactory then new ones will have to be adopted if we are to avoid meeting the same trouble at some future time.

Improvements will undoubted ly be made and new knowledge gained from year to year but if we adopt the best that is known at present we can avoid the repetition of the loss that has been sustained this year.

Solicitor Ostlund attended a special Council meeting here Monday night.

Lightning broke windows of a home in Barons last Sunday night and the shock was sufficient to knock down one or two members of the family. The heavy shower followed this light ning flash.

NEWS NOTES

Russia expects to increase its oil production 18% this year.

* * * *

Bill Reber and family moved into the Mrs. Jeffrey home on Tuesday last.

* * *

WANTED — Two or three passengers for June Convention Expect to leave shortly after June 1. Information at the Recorder Office.

* * *

The lawn at the 2nd Ward Chapel is getting started nicely now and the Committee have most of their trees and shrubs planted. If the livestock can be kept off the premises this corner will make a very beautiful sight before fall.

* * *

Reports seem to indicate that the rainfall here Sunday night was much heavier than in Cardston. In fact Cardston district received barely enough to settle the dust. DelBonita seemed to be the favored spot when rain fell steadily for two hours.

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

NOSE BLEEDS

Stop those repeated nose bleeds before you lose your job. Business today demands a great deal if you are to keep your head above the tide and you cannot do this when your health is being undermined by frequent hemorrhages from the nose. Often the cause and remedy are so simple too. A small blood vessel towards the front of the nose bursts its wall and bleeds for awhile. Soon it stops but before it is completely healed it breaks through at the same place again, and this may occur a number of times. Your doctor can cure these nose bleeds by sealing off the offending vessel with some form of cauterization. It takes but a short time and is usually painless.

When you are faced with the alarming picture of blood pouring from the nose what are you to do? Well, first of all do not plug the nose with anything, as this merely causes further injury to the broken wall of the bleeding vessel. Tight pressure with the finger on the outside of the nostril which is bleeding will usually control the haemorrhage in about five minutes.

All nose bleeds of course are not due to bleeding vessels at thefront of the nose. Common causes in children are adenoids and foreign bodies, such as beads and buttons. These usually cannot be discovered except by your doctor, who also can remove the cause and so stop the bleeding.

Some adults suffer from high blood pressure which indirectly may be the source of the repeated nose bleeds. Here the blood from the nose is a warning that other trouble is present and the sign should not be neglected. In older people growths in the nose cause irregular bleeding and the sooner the tumour is discovered and treatment begun the greater the chance of cure.

So it is very important that all persons suffering from repeated nose bleeds should be examined by their doctor in order to find out the cause and to commence treatment before too much damage is done

Questions concerning health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by letter.

CONTROL OF WILD OATS BY DELAYED SEEDING OF GRAIN

(Experimental Farms Note)

During the years 1929 to 1934 Reward wheat averaged 23.2 bushels per acre on summerfallow 17.25 bushels per acre on stubble land on an area infested with wild oats in the Experimental Farm at Indian Head, Sask. This excellent result was obtained by delaying the seeding of wheat and destroying some of the wild oats before seeding.

Reward wheat, which is an early maturing variety of wheat was seeded as late as May 25th with good success. This late seeding permitted the killing of a crop of wild oats by cultivation before the Reward wheat was seeded.

Shallow after-harvest cultivating to encourage the germination and spring cultivation to kill wild oats, coupled with the seeding of early maturing grain crops, such as Reward wheat, is one of the most effective methods of controlling this weed.

Other crops which may be used for deferred seeding are barley and oats for green feed

The duck foot cultivator was found to be very satisfactory implement for after-harvest and spring work in control of wild oats.

W. H. Gibson,
Experimental Farm,
Indian Head, Sask.

I had rather have the pep to climb a mountain in my path than to have no mountain and no pep.

A LITTLE MORE PER GALLON WILL MEAN 2 OR 3 YEARS MORE WEAR

LOWE BROTHERS "High Standard" House Paint costs little more per gallon than "cheap" paint, BUT when you paint with "High Standard", you are assured of the utmost in durability and general service.

There is lots of "cheap" paint sold but seldom twice to the same man. One such purchase teaches an expensive lesson.

Using LOWE BROTHERS High Standard House Paint is the true measure of economy. It not only wears for many years, but being easily applied, it cuts down labor cost: covering more surface, it means fewer gallons for the job:

Remember—"One gallon of Lowe Brothers Paint will go twice as far, look and wear better than two gallons of cheap paint.
